## LEARNING ACTIVITY SHEET

### SPECIAL PROGRAM IN ICT 9

### WEB DESIGN 9

*Third Quarter, Week 2*

Name of Learner: \_\_\_\_\_

Grade Level /Section: \_\_\_\_\_ Date: \_\_\_\_\_

## LINKING TO THE SAME PAGE

### BACKGROUND INFORMATION FOR LEARNERS

There are webpages with so much content and it keeps you too long to scroll from the top to reach going to the bottom of the web page. Creating bookmark links allows readers to easily jump to specific parts of a web page. HTML bookmarks answer the problem if a web page is very long and you want to jump in any part of the webpage.

Bookmarks are created using the id attribute. An id can be added in most html elements. IDs are called by adding the pound (#) symbol to the ID name.

```
<h1 id="top">The top Page of this WebPage </h1>
```

```
<li><a href="#top"> Back to Top </a></li>
```

In this example, the h1 element marks an id of “top”. You can use any other word/s to name an id. When the id value “top” is called by adding # symbol, you will automatically jump to the top part of the current webpage. The #top is called inside the anchor tag using the href attribute.

Try to watch and apply the example in the video presentation in this link <http://bit.ly/LinkingSamePage> for the hands-on demonstration.

## **LEARNING COMPETENCY**

Create hyperlinks to a Page: Linking to the Same Page

### **ACTIVITY 1:**

#### **Directions/Instructions**

Create a webpage entitled “All About Myself” and add bookmarks in each part of your webpage. Your webpage should have four parts namely: personal information, family background, likes and dislikes and the last part would be your plans or ambitions.

Use four headings in each part of your webpage where your id will assign. After assigning id name in each part, create hyperlinks and use the # to call the assigned id. The expected outputs in your webpage about yourself contains the following:

1. Heading 1 that says “Personal Information” and assigned an id name you want. Create a paragraph and include your whole name, address, grade and section, and others. Make at least five sentences.
2. Heading 2 that says “Family Background” and assigned an id name you want. Create a paragraph and include your parents name, and anything about your family. Make at least five sentences.
3. Heading 3 that says “Likes and Dislikes” and assigned an id name you want. Create a paragraph and include your favorite foods, colors and others. Make at least five sentences.
4. Heading 4 that says “Plans or Ambitions” and assigned an id name you want. Create a paragraph and include plans or ambitions. Make at least three sentences.

## **Guide Questions:**

Type your answer in the Private Comment Section of our Google Classroom.

1. What html attribute are used to create bookmark links?
2. What symbol is added to call the bookmark links?

## **REFLECTION:**

Type your answer in the Private Comment Section of our Google Classroom.

- What is the difference between creating hyperlink that link to the same page and hyperlink that links to another page?
